### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, 17, drawn to an anti-theft system for inhibiting an engine of a vehicle from restarting in response to reception of an theft signal, classified in class 340, subclass 426.12.
  - II. Claims 7-16, drawn to a system for detecting speed of a vehicle in response to an alert signal, classified in class 340, subclass 426.13.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II are clearly unrelated as set forth above because the anti-theft system for inhibiting an engine of a vehicle from restarting in response to reception of an theft signal has different modes of operation, different functions, and different effects from the system of group II. To be more specific, group I is directed to inhibiting an engine of a vehicle from restarting while group II is directed to detecting speed of a vehicle.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2632

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
